

A line graph showing the DIIS Error. The blue line starts at a high value on the left and decreases rapidly, then levels off into a nearly horizontal line towards the right.

**DIIS Error**

A line graph showing the energy difference ΔE. The blue line starts at a low value on the left and increases steadily, then levels off into a nearly horizontal line towards the right.

**$\Delta E$**

A line graph showing the α HOMO energy ε\_HOMO^α. The blue line starts at a low value on the left, rises sharply to a peak, and then remains relatively flat with minor fluctuations.

**$\epsilon_{HOMO}^{\alpha}$**

A line graph showing the α Gap. The blue line starts at a high value on the left, drops to a minimum, and then rises to a local maximum before decreasing again.

**$\alpha$  Gap**

A line graph showing the β HOMO energy ε\_HOMO^β. The blue line starts at a low value on the left, rises to a peak, dips slightly, and then rises to another peak before decreasing.

**$\epsilon_{HOMO}^{\beta}$**

A line graph showing the β Gap. The blue line starts at a low value on the left, rises to a peak, dips to a minimum, and then rises again.

**$\beta$  Gap**
